

TALENT · TECHNOLOGY · AI

Build the team. Modernize the enterprise. Put AI to work.

Zirone brings specialized talent, enterprise technology consulting, practical AI delivery, and applied learning under one accountable partner.

Zirone Talent

Contract, contract-to-hire, direct-hire, and project talent across technology and professional disciplines.

Technology & AI

Enterprise applications, data, cloud, security, modern engineering, and responsible AI delivery.

Zirone Forge

Applied learning for professionals and teams moving from concept to build to deployment.

Core expertise

Enterprise Applications & ERP

ERP and platform advisory · Higher-education systems · Integration · Upgrades · Testing · Support

AI & Intelligent Automation

Opportunity and readiness · Enterprise AI architecture · Copilots · Evaluation · Forward-deployed engineering

Data, Integration & Analytics

Data strategy · Pipelines · APIs · Integration · Analytics · Quality and governance

Cloud, Security & Engineering

Cloud architecture · Cybersecurity · Application modernization · DevOps · Quality engineering

Engagement models

Talent: contract · contract-to-hire · direct hire · project teams

Consulting: focused discovery · proof of value · implementation support · embedded expertise

Learning: private team workshops · curated cohorts · applied build labs

02 / INDUSTRY CONTEXT

Industry context

Different industries change the requirement, evidence, and delivery risk. Zirone keeps the business model simple while calibrating the work to the environment.

Higher Education	Enterprise applications, ERP, student systems, data, integration, change, and specialist talent.
Healthcare & Life Sciences	Technology, operations, revenue cycle, data, cloud, security, and specialized support talent.
Manufacturing & Engineering	Engineering, EHS, quality, operations, ERP, analytics, integration, cloud, and cybersecurity.
Legal & Professional Services	Legal operations, compliance, business support, knowledge systems, secure AI, workflow, and security.
Financial & Business Services	Finance, risk, compliance, operations, data, enterprise platforms, cloud, security, and AI.
Public & Mission-Driven	Program and operations talent, modernization, data, integration, accessibility, cloud, security, and AI.

Signature depth

Zirone's approach is shaped by more than 18 years of hands-on enterprise application and higher-education technology experience. That depth strengthens requirements, search quality, integration thinking, and delivery context.

How Zirone works

01 · Align	02 · Qualify	03 · Deliver	04 · Improve
Define the real outcome and constraints.	Test fit with evidence and clear gaps.	Put the right people and plan around the work.	Close the loop and strengthen the next move.

Start with the real requirement.

Share the role, roadmap, or hard problem.
